

I've always been a people watcher. It used to be like watching the Andy Griffith show...

Now a days, it seems more like The Twilight Zone.

**No matter how weird the world gets, it's a
brighter place because you're in it!**

Happy Birthday!

This card is formatted to be printed on standard 8 ½ x 11 inch paper. Printing on any other size will require reformatting. I prefer cardstock over normal bond paper for making cards.

Printing: some printers may be able to print these files correctly by simply using the duplex setting, but I have found that printing one side at a time tends to produce better results. For most printers all you'll need to do is tell it to print "page 1", then reinsert the printed sheet, exactly as it came out of the printer, back on top of the paper tray and print "page 2". Your printer may not function the same way, but the manual should give you clear instructions on how to create a duplexed documents.
